Driven by better sound.

We don't think of ourselves as an audio company — we're an idea company. And it's our passion for the details that makes big things happen. Details like the precise arrangement of microphones in our wireless noise cancelling headphones. Details like the proprietary technologies that let us pack big sound into small speakers, so you can take your music to places it's never been before. In the words of our founder, Dr. Amar G. Bose, we "always dream of things that are better, and think of ways to reach those things." That's what we do — we never stop imagining how to outperform what has come before.
