

The Bose logo is displayed in white, italicized, uppercase letters on a black rectangular background.

PROFLIGHT
AVIATION HEADSET

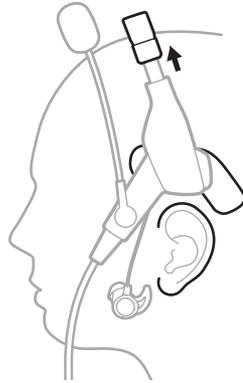

Please read and keep all safety and use instructions.

①

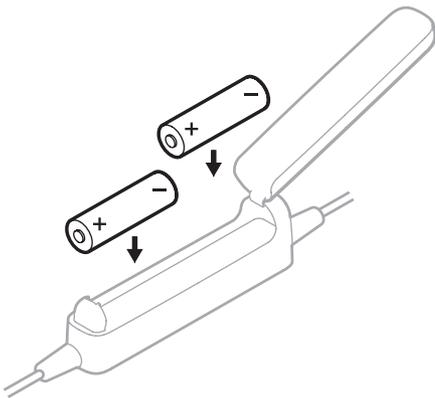

- A. Locate the left **L** and right **R** icons on the headband to orient the headset properly.
- B. Rotate the side pads into position.

②

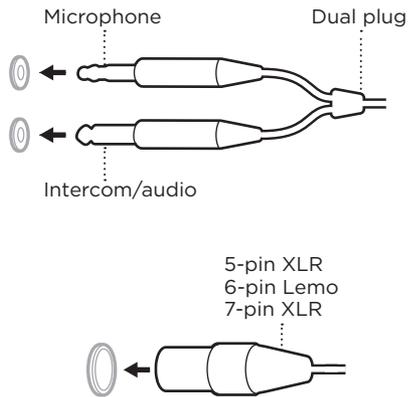

- A. Place the headset on your head.
- B. Adjust the headband so the side pads rest above your ears.

⑤

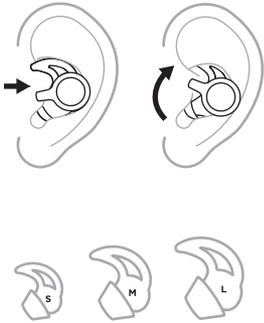

Insert the AA batteries (2) into the control module.

⑥

Insert the aircraft connector into the aircraft control panel.

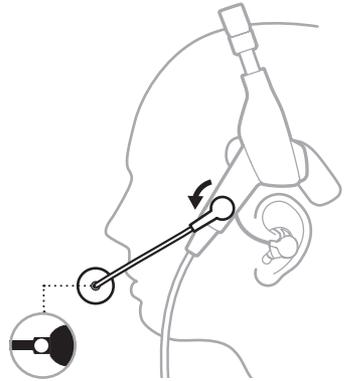

3

- A. Insert the earbuds.
- B. Tilt the earbuds back, and tuck the wing under the ear ridge until the fit is secure.

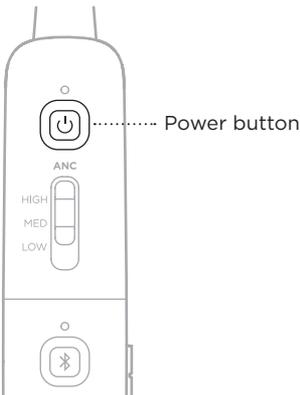

NOTE: Medium tips are attached. Refer to the owner's guide for more information on proper fit.

4

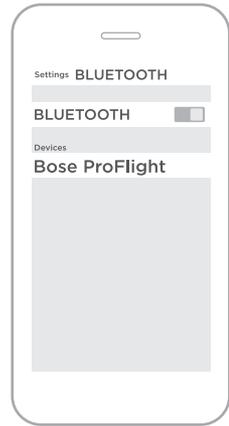

Adjust the microphone so it is 0.5" (12.7 mm) from your lips and the white surface is facing your mouth.

7

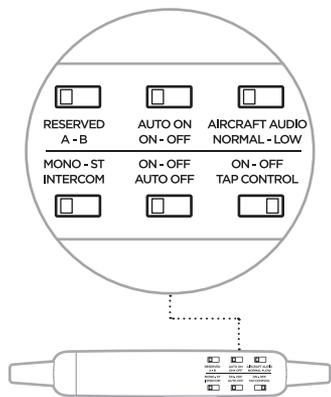

8

On the control module, press the Power button .

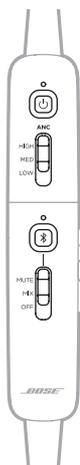

NOTE: For Dual plug only. For 5-pin XLR, 6-pin Lemo, and 7-pin XLR, the headset powers on automatically when connected to aircraft power.

Connect your mobile device.

Operation switches

| | |
|----------------|--|
| Reserved | Reserved for future use. |
| Auto on | Power on automatically when connected to aircraft power. |
| Aircraft audio | Set sensitivity/volume of intercom audio. |
| Intercom | Process audio as mono or stereo. |
| Auto off | Power off automatically after 3 to 45 minutes of inactivity. |
| Tap Control | Enable Tap Control interaction. |

Acoustic Noise Cancelling™ functions

| | |
|--------|--|
| High | Maximum quiet and noise cancellation across the entire spectrum. Best signal to noise ratio for radio and intercom communications. |
| Medium | Optimized mode for quieter aircraft. |
| Low | Best for interpersonal communication outside of the intercom. |

NOTE: To set noise cancellation to Low on a single earbud, set the Tap Control switch to On, and firmly double-tap the earbud.

Bluetooth® audio priority

| | |
|------|--|
| Mute | When an intercom signal is detected, mobile device audio is temporarily muted until intercom audio ceases. |
| Mix | When an intercom signal is detected, mobile device audio is mixed with intercom audio. |
| Off | Only intercom audio is active. <i>Bluetooth</i> functionality is disabled. |

To enhance your headset experience, download the Bose® Connect app.
