

Our Commitment to You

We take great pride in designing each of our products with the goal of providing the highest-accuracy musical performance possible in the price range of that product. We strive to reproduce the musical sounds as closely as possible to those of the original performance. And we strive to avoid flashy sounds such as those associated with accentuated bass and/or treble frequencies. While those sounds may be initially attractive to the novice, they are not real and are not enduring. In addition, we use only the highest-quality parts and the latest assembly and quality control techniques to ensure the reliability and long life of our products.

Our reputation rests on our steadfast pursuit of this policy in music and entertainment systems for the home, the automobile, and businesses. At Bose, we are committed to investing in research that continually gives rise to new technologies for improving sound reproduction.

When you purchase any product from Bose, we encourage you to compare it, as we do, to competitive products for musical accuracy. We believe that this process will enhance your appreciation of the product you select. With best wishes from all of us at Bose for many years of enjoyable listening.

Wave® SoundTouch® music system series IV

Należy zapoznać się z Ważnymi zaleceniami dotyczącymi bezpieczeństwa dostarczonymi razem z urządzeniem.
Leia as Instruções de Segurança Importantes fornecidas na embalagem.
Läs igenom Viktiga säkerhetsanvisningar som finns i förpackningen.
