TECHNICAL DATA

ArenaMatch AM40
DeltaQ array loudspeaker

Product Overview
Bose Professional ArenaMatch loudspeakers bring proven DeltaQ sound quality and flexibility to outdoor installations — sports stadiums, arenas, outdoor entertainment centers, and more. Rated for direct-exposure outdoor installations, ArenaMatch DeltaQ modules make it easy to create outdoor loudspeaker arrays that bring consistent, intelligible sound to every listener. Nine coverage patterns are available. Choose from modules with 10°, 20°, or 40° vertical coverage and easily swap between 60°, 80°, or 100° horizontal waveguides to build arrays that are lighter, require less installation time, and can lower overall system costs by delivering full coverage with fewer modules.

Key Features
Improving sound quality, consistency, and vocal clarity with DeltaQ array technology, which allows directivity, or “Q,” to vary in each module to more precisely match coverage to the audience area
Easily customize horizontal coverage with replaceable waveguides that allow you to further customize coverage and even form asymmetrical patterns for improved acoustic performance in left/right arrays
Delivering high-SPL, long-throw music reproduction and vocal intelligibility with a 14-inch neodymium woofer and six Bose EMB2S titanium-diaphragm neodymium compression drivers
Rated for direct-exposure outdoor installations, with three-layer stainless steel grille, water-resistant woofer cone coating, industrial polyurethane exterior coating, and molded input cover
Providing full coverage with fewer modules — 10°, 20°, and 40° modules allow you to create arrays that improve sight lines, reduce weight, and lower system costs by requiring fewer modules compared to conventional arrays
Reducing commissioning time by using 40° modules for point-source applications and 10°, 20° and 40° modules for line arrays — all with the same transducers for consistent tonal balance
Adapting to a variety of configurations — all models ship standard with bi-amp capability, passive crossover, and 70/100V transformer inputs
Streamlining the design process by combining with complementary Bose Professional products, such as ArenaMatch Utility zone-fill loudspeakers, PowerMatch amplifiers, and ControlSpace DSPs
Saving time during installation using Bose accessory mounting hardware or use the standard M12 threaded inserts to interface with custom array frames

#### Certifications

#### Transducers

- **Low Frequency**: 1 × Bose LF14 neodymium 14-inch woofer (4-inch voice coil)
- **High Frequency**: 6 × Bose EMB2S titanium-diaphragm, neodymium compression drivers (2-inch voice coil)

#### Physical

- **Enclosure Material**: Exterior-grade birch plywood
- **Finish**: Two-part polyurea coating, black
- **Grille**: Powder-coated perforated stainless steel, acoustic foam, stainless steel mesh
- **Environmental**: Rated for direct-exposure outdoor installations (IP55 per EN60529; IP33C per EN54-24)
- **Connectors**: Barrier strips: passive in/through, bi-amp, and 70V/100V, with cover
- **Suspension/Mounting**: 8 × M12 non-stainless steel threaded inserts (4 per side); 2 × M10 stainless steel threaded inserts (1 per side); 2 × M6 stainless steel threaded inserts (1 per side); 1 × M10 stainless steel threaded insert, rear safety connection
- **Dimensions (H × W × D) – millimeters**: 489 × 783 × 400 mm (19.3 × 30.8 × 15.8 in)
- **Net Weight**: 34.9 kg (77 lb)
- **Shipping Weight**: 42.2 kg (93 lb)
- **Accessories**: U-bracket, array suspension kits, waveguide kits

#### Product codes

- **794042-6680**: ARENAMATCH AM40/80 OUTDOOR LDSPKR 80x40
- **794042-3380**: ARENAMATCH AM40/60 OUTDOOR LDSPKR 60x40
- **794042-8880**: ARENAMATCH AM40/100 OUTDOOR LDSPKR 100x40

#### Footnotes

1. Frequency response and range measured on-axis in anechoic environment with recommended bandpass and EQ. Frequency response graphs display SPL axis with 0 dB line referenced to sensitivity SPL value.
2. Bose extended-lifecycle test using pink noise filtered to meet IEC268-5, 6-dB crest factor, 500-hour duration.
3. AES standard 2-hour duration with IEC system noise.
4. Sensitivity measured in anechoic environment with recommended bandpass and EQ.
5. Maximum SPL calculated using sensitivity and power ratings, exclusive of power compression.
6. Tested to IP55 per EN60529 when used in General Purpose Audio installation
