ControlSpace® Remote v2.8

Release Notes

24 October 2019

Revision: 1.0

General

This release of ControlSpace Remote software adds support for the following new features:

- ToneEQ control can now be moved and resized

This release of ControlSpace Remote fixes various issues including:

- Gain min/max values were not being saved and applied properly in CSRBuilder 2.6.
- Group Selectors were unable to be controlled on mobile device but were working in CSRBuilder
- PowerShare did not update Remote app IP Address on in CSRBuilder.
- Users were able to enter CRR gain values outside the set gain limits
