

Bose Professional Advances FreeSpace Loudspeaker Options

Refined Features and New Pendant Models Offer Increased Flexibility for More Projects

AMSTERDAM, Feb. 12, 2020 — [Bose Professional](#) (Stand 7–C200) today announced the next evolution of the FreeSpace DS series of loudspeakers — the Bose FreeSpace FS series. Available in both in-ceiling and surface-mount models and with a dedicated pendant-mount model, the FreeSpace FS series is ideally designed for voice address and background music applications. All models are available in both black and white, and feature 70/100V and low-impedance operation. Models feature either a 2.25-inch or 4.5-inch, full-range transducer, providing two distinct levels of performance.

The new FreeSpace FS loudspeakers deliver the same output and power handling as the original FreeSpace DS models, while providing additional features for use in wider applications. Metal backcans on the ceiling-mount models allow for use in plenum-rated ceilings. The ceiling-mount models also feature front baffle connection points and tap settings, with Euroblock audio connections.

Improved aesthetics and mechanical updates ensure easy installation in a variety of spaces, including outdoors. The FreeSpace FS surface-mount loudspeakers and the FS4CE, 4-inch, ceiling-mount model are IP55 rated for outdoor installation. All FreeSpace loudspeakers are UL1480 ULC-S541 Life Safety Fire Alarm and Signaling listed, providing peace of mind for those life safety projects. The updates bring greater design and specification flexibility to the well-known Bose Professional FreeSpace family of loudspeakers and complements its premium line of DesignMax loudspeakers.

About Bose Corporation

Bose Corporation was founded in 1964 by Dr. Amar G. Bose, then a professor of electrical engineering at the Massachusetts Institute of Technology. Today, the company is driven by its founding principles, investing in long-term research with one fundamental goal: to develop new technologies with real customer benefits. Bose innovations have spanned decades and industries, creating and transforming categories in audio and beyond. Bose products for the home, in the car, on the go and in public spaces have become iconic, changing the way people listen to music.

Bose Corporation is privately held. The company's spirit of invention, passion for excellence, and commitment to extraordinary customer experiences can be found around the world – everywhere Bose does business.
