

Now Available, the Bose Noise Cancelling Headphones 700 UC Helps People Collaborate with Ease

Unparalleled Audio and Connectivity Make the Ideal UC Experience a Reality

FRAMINGHAM, Mass. — Sept. 22, 2020 — [Bose Professional](#) has announced their much anticipated Noise Cancelling Headphones 700 UC are now shipping in the U.S. and Latin America, and will also be available in Asia and Europe in September and October respectively. Certified for Microsoft Teams and compatible with both Zoom and Google Meet, the NCH 700 UC equip users for better collaboration in the workplace and beyond, whether in the office or remote and everywhere in between.

The NCH 700 UC feature an adaptive eight-microphone proprietary system — with four of the mics dedicated to isolating the user’s voice, so they sound natural and clear — while the array actively hunts down and rejects noise so only the important details are heard. The 11 levels of noise cancellation let users personalize what is heard from the surrounding environment — from virtual silence to open and ambient. The included Bose USB Link Bluetooth® module provides a reliable connection to both your computer and mobile phone simultaneously, enabling you to quickly jump on calls with either device.

“With approximately one-third of global knowledge workers working outside of the traditional office, we’re thrilled to deliver such a powerful, adaptive device that’s easy to use and works with a wide variety of cloud services, like Microsoft Teams, Zoom and Google Meet,” stated Martin Bodley, director and global head, Bose Work at Bose. “With Bose Work, we continue to deliver technology to support the way we work and where we work. The NCH 700 UC deliver the audio quality and connectivity so you can focus on what’s important.”

Collaboration is about working together through technology, not being hindered by it. With the Bose Noise Cancelling Headphones 700 UC, you stay focused, minimize distraction, collaborate with confidence — wherever you are.
